

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listing of claims in the application:

LISTING OF CLAIMS:

Claim 1 (Original) A rotatable decorative-article structure comprising a rotating device connected with and supported by a base device, the rotating device further comprising:

a fixed seat including a through opening and an annular slot with a guiding surface;

a motor with a shaft mounted on the fixed seat;

a guiding cylinder located inside the annular slot, including a guiding wall to form a guiding track with respect to the guiding surface; and

a rotating seat rotatably furnished in the annular slot, including a ring gear driven by the shaft of the motor, and at least one guiding pillar with a guiding wheel sliding within the guiding track.

Claim 2 (Original) The rotatable decorative-article structure of claim 1 wherein the fixed seat further includes a cavity with an orifice going through the annular slot.

Claim 3 (Original) The rotatable decorative-article structure of claim 1 wherein the guiding surface is a waved surface.

Claim 4 (Original) The rotatable decorative-article structure of claim 1 wherein the rotating seat further includes at least one pillar hole for receiving the guiding pillar.

Claim 5 (Original) The rotatable decorative-article structure of claim 1 wherein the guiding track is a waved track.

Claim 6 (Original) The rotatable decorative-article structure of claim 1 wherein the motor further includes a gear on the shaft for engaging with the ring gear.

Claim 7 (Original) The rotatable decorative-article structure of claim 1 wherein the rotating device further comprises a decorative top housing, and a fiber decoration on the top housing.

Claim 8 (Original) The rotatable decorative-article structure of claim 1 wherein the guiding pillar has a L-shaped plate formed on the top end thereof, and the guiding wheel is located on the L-shaped plate.

Claim 9 (Cancelled).

Claim 10 (Original) The rotatable decorative-article structure of claim 1 wherein the base device comprises a motor, a light source and a speaker mounted on a base plate, and the motor connects a transparent color plate located above the light source.
